DETAILED ACTION

Claim Rejections - 35 USC § 112

1. The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

2. Claims 10, 16, 17, 20, 21, 22, 24, 35, 36, 28, 39, 29-33, 40 and 41 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention. The above listed claims either directly or indirectly call for a hard material body that has an end surface comprising a canted portion extending to the periphery and an uncanted portion extending to the periphery. The canted portion intersects the periphery along a periphery line and wherein the entire periphery line extends along a plane. Such an embodiment (i.e., end surface including both a canted portion and an uncanted portion and the periphery line defined by the intersection between the canted portion and the periphery extends along a plane) has no support in the originally filed specification or drawings. It is noted that the embodiment of Figures 5A, 5B, 6, 12A and 12B does not have an uncanted portion. The remaining embodiments that have a canted portion and an uncanted portion do not a "periphery line" that extends along a plane as recited.

Allowable Subject Matter

3. Claims 9, 11-15, 23, 25, 34, 26, 37, 27 and 38 are allowed.

Response to Arguments

4. Applicant's arguments with respect to claims 10, 16, 17, 20, 21, 22, 24, 35, 36, 28, 39, 29-33, 40 and 41 have been considered but are moot in view of the new ground(s) of rejection.
